IP Hider Pro Crack + For Windows

KEYMACRO is a software utility designed to encrypt all your incoming and outgoing e-mail, PGP messages and other sensitive information. Privacy protection for all data This software offers an all-in-one package that provides a reliable way of protecting all your sensitive information from any type of damage and loss. It has been created to help people ensure that

their privacy is being kept intact. The user is given access to the various actions that can be performed by this app. The necessary settings are shown in a clear and concise manner, you can easily get the hang of things. It is essential to state that this tool does not require the use of any VPN. This means that you can use it without breaking any rules set by your Internet service provider. Because it is compatible with all programs and the operating systems it is compatible with, this tool is likely to do wonders for your privacy.

Good Data Encryption Even though this program claims to offer the best encryption tools, it is crucial to mention that it is not at all necessary to use it. This is because it comes with an in-built tool that can encrypt all your data at no extra cost. All the data that you have within its reach are encrypted through this method, including emails, messages, address book, phone numbers, and all those passwords that can be found on your PC or smartphone. Surprisingly, the app comes with an inbuilt tool that is able to store passwords so they are never revealed in clear text. This helps you avoid the chances of a hacker spying on you and knowing what you are using for online services.

Keygen Generator The Keygen tool is also available for those who want to generate a new activation key, making sure that the software doesn't expire. This comes in handy when it comes to ensuring that you have access to the most updated version of the program.

Features and advantages Keymacro is able to access data, modify it, send and receive PGP messages, and encrypt incoming and outgoing data. It does not make use of any resources, thanks to its all-in-one design. The main purpose of this app is to allow users to make sure that the data that they send and receive is being kept private. It does not need any VPN in order to work. You can use it without breaking the law. The in-built tool does most of the encrypting for you, meaning that you do not have to bother about using another tool. It is 81e310abff

IP Hider Pro Crack Free Download For Windows

► Hide all your tracks, locations and browsing history ► Stealth mode: your device is invisible
► Custom settings for PC or MAC ► Stealth mode for download and uploads ► Automatic scan of your network

What is IP Hider Pro? IP Hider Pro is a software utility that was built specifically to enable people to enhance their privacy while being connected to the Internet. Surprise-free setup and structured environment The installation process does not offer to download or add any products that are not actually needed for the program to work properly and it over in a jiffy. When you are done with it, you are greeted by a simple and well-organized interface. It encloses a menu bar, a few buttons and drop-down menus, and two panes which ensure you a quick access to all available options. It becomes quite clear that both power and novice users can find their way around it, without experiencing any kind of difficulties. If by any chance you do not know how to handle something, you can consult the online Help contents provided by the developers. Change connection at a custom period of time This tool displays a list of all servers you can connect to, along with details such as country, city, IP address, signal strength and status. Furthermore, you can change the connection at a user-input number of minutes and view programs, received and sent data, rate and other details being routed through the new IP. Aside from that, from the settings panel, you can choose to redirect all network apps or create a list of those which should hide traffic. Conclusion All in all, IP Hider Pro proves to be an efficient piece of software when it comes to redirecting all your traffic through a different IP address. It does not put a strain on the computer's performance, all tasks are performed quite fast and the interface is accessible.
